Emergency Management Assistance Compact (EMAC) resources in California

The Emergency Management Assistance Compact (EMAC) is the Nation's mutual-aid system that provides a formal structure where all 50 States and 4 Territories have the ability to share resources across State boundaries. The Cal OES EMAC Coordinator in coordination with Cal OES Fire Branch are working together to request and coordinate needed resources via the EMAC Compact.

- The following states have EMAC resources in California:
 - Idaho: 5 engines
 - Montana: 5 engines
 - New Mexico: 5 engines
 - Washington: 15 engines
 - Utah: 10 engines
 - Texas: 25 engines

Water Supply Service Disruption, City of Stratford, Kings County

On 08/12/18 at 1600 hours the California State Warning Center was notified by the Inland Duty Officer that the wells servicing the community water system in Stratford, Kings County, have failed and that the community has been without water since this morning.

- An assessment on the system will be conducted tomorrow 8/13/2018 at 0700, more information on the well failure, as well as an ETA of the duration of the disruption will be shared following the on-site assessment of the system.
- SPUD (Stratford Public Utility District) will be working with the State Water Board to issue a do not drink notice and coordinate the receipt of water from an agriculture well for sanitation purposes only, and the notice will be hand delivered to residents.
- Duration is estimated for 7 days on the notice.
- The procurement of drinking water supplied to the community by SPUD is in progress.
- A temporary connection is also being established to supply water to a local dairy to ensure that the needs of the animals can be met.
- Fire has a contingency plan in place to increase fire suppression resources at Station #10 if needed, 4000 gallons on site.
- Environmental Health, the Medical Health Operational Area Coordinator, Fire, and OEM have all been notified and Environmental Health is working with the State Water Board for addressing public health concerns.

WEATHER OF CONCERN

Weather of Concern

- Air Quality Alerts issued for portions of California until wildfires are extinguished.
- Thunderstorm chances increase Sunday and Monday, mainly south of Highway 50. Coverage increases Tuesday, with more widespread storms expected. Isolated stronger storms are possible on Tuesday. Threats include dry lightning creating new fire starts, strong outflow winds, brief heavy rainfall, small hail, and possible debris flows on burn scars.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

*** Isolated thunderstorms Eastern Areas Tuesday and Wednesday ***

A low pressure trough remains over the coast from WA to northern CA and high pressure remains over the Desert SW. This pattern will persist through much of the upcoming week, continuing a light SW flow aloft over Northern California.

Monsoon moisture and moist unstable air from former Hurricane John will gradually spread northward into the region early in the week. Isolated thunderstorms will remain south and east of the Lake Tahoe region through Monday. Thunderstorm chances will increase in the eastern areas on Tuesday, and a few lingering thunderstorms are possible in the northern and eastern mountains Wednesday. Models are still not consistent on the thunderstorm amounts or locations, but they do show a trend back to hot and dry weather late in the week as high pressure returns.

Surface winds will follow a typical summer diurnal pattern, with peak afternoon W-NW gusts along the coast and W-SW gusts through the I-80 corridor into the delta and in the East Bay Area to 25-35 mph, and up to 25 mph from the Cascade-Sierra crest east. Minimum RH east of the Cascade-Sierra crest will be 5-15% and inland areas west of the crest will see RH drop to 8-18% in the driest spots through Monday, followed by higher RH Tuesday and Wednesday.

SOUTHERN CALIFORNIA

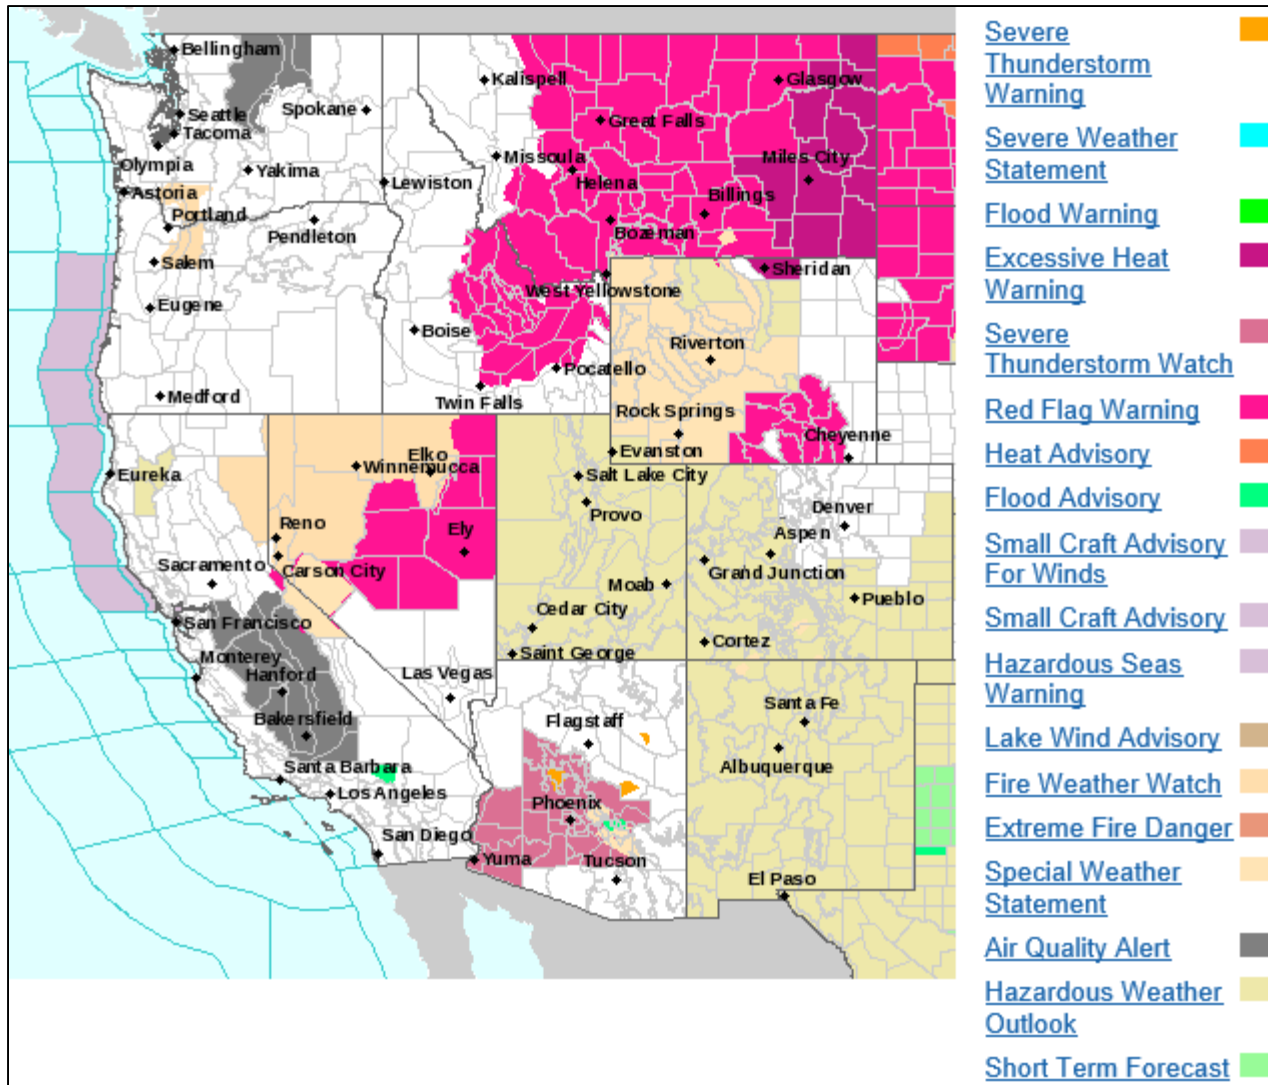

Decreasing thunderstorm coverage over the mountains and deserts after today

Sea breeze expected each afternoon through Tuesday

Weak troughing off the California coast will result in near normal temperatures across much of the region during the next few days. Moderate onshore flow will allow for breezy afternoons along the coast with locally windy conditions across parts of the Mojave during the afternoon and evening hours through Tuesday. There will be enough moisture and instability to produce isolated wet thunderstorms across the mountains and deserts with the best chances over the Sierra Crest today. The threat of isolated thunderstorms will continue over the high Sierra through Tuesday, but elsewhere it should be dry. By the mid-week, high pressure will slowly return and will become anchored over the central and northern portions of the state. We can expect daytime highs to climb to above normal levels during the latter half of the work week with valley highs around the century mark. Monsoon moisture will increase over the southern portions of the state during this time with increasing chances for afternoon thunderstorm across the mountains and deserts once again.
